

Cam Webb: Informatics Interests

- Data integration using RDF
 - Ontology development (Darwin-SW ¹)
 - Easy publishing (ezDBDB ²)
- Checklists* and identification tools
- Citizen science
- Social networks for science (taxonomic input in `xmalesia` ³)
- Mobile Applications (`treemap` ⁴)
- Phylo-informatics (`phylocom` ⁵)

Challenge questions

- **Goal:** integrated information resources for the plants of E and SE Asia (checklists, synonyms, identification tools, photos, specimen data, forest plot data, observations...)
 - **Openness:** How do we develop trust and understanding about the benefits of sharing primary biodiversity data
 - **Interoperability:** How *do* we share data easily (RDF?)
