

Smart City Project Initiative at NECTEC

Alisa Kongthon, Ph.D.

National Electronics and Computer Technology Center (NECTEC)

Thailand

ABOUT NECTEC

- The National Electronics and Computer Technology Center (NECTEC) was established on 16 September 1986 under the Ministry of Science, Technology and Energy (the former name of Ministry of Science and Technology).
- On 30 December 1991, following the enactment of the Science and Technology Development Act of 1991, NECTEC was transformed into a national technology center under the National Science and Technology Development Agency (NSTDA), Ministry of Science and Technology.

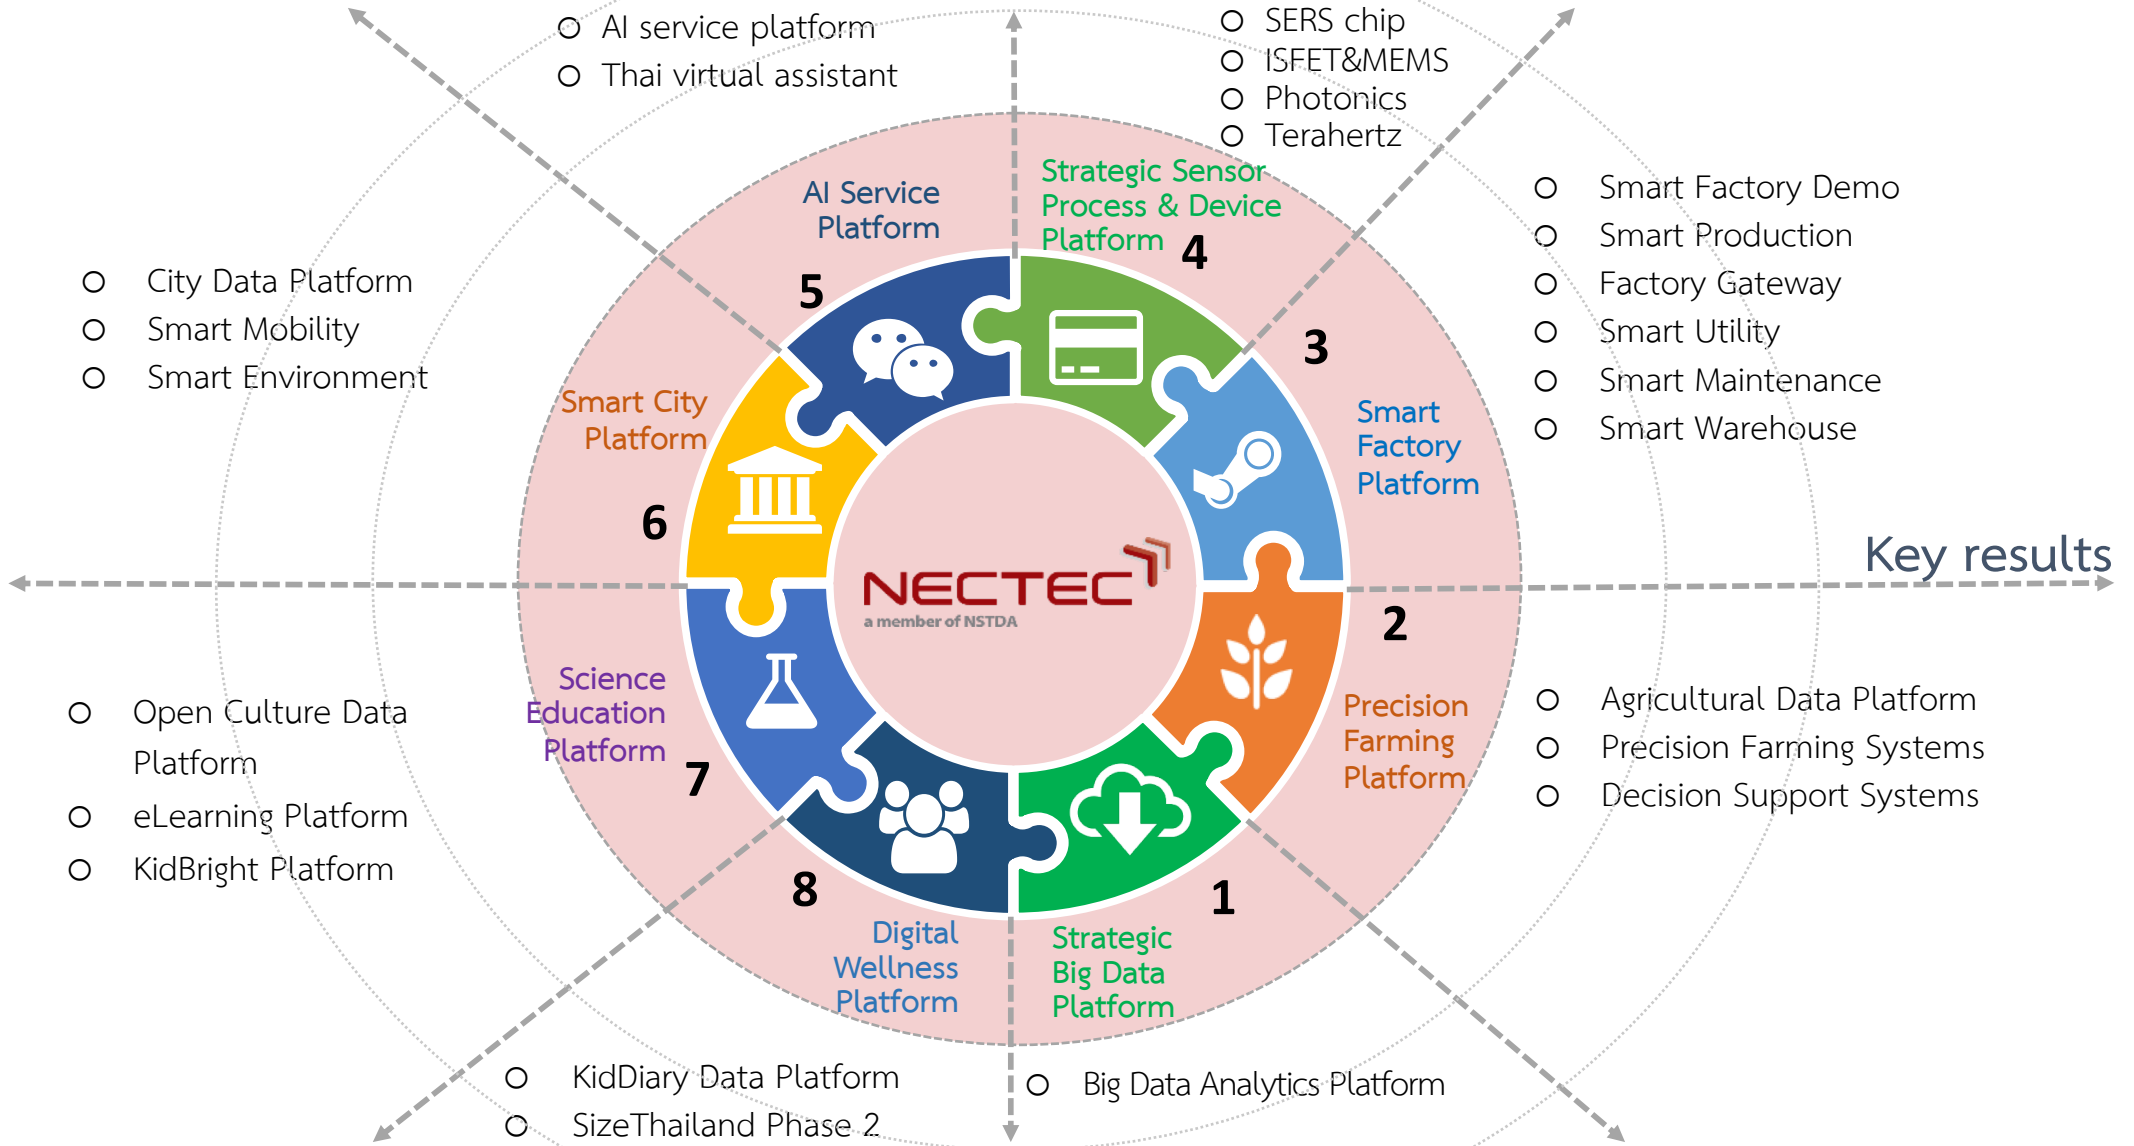

VISION

To be the foundation for advanced electronics and information technology development in Thailand.

MISSION

- To build technology foundation for the country.
- To foster the development of technology ecosystem together with our strategic alliances.
- To get ready for the development of frontier technology.

Target Output Profile (2019 – 2021)

What Drives Smart City Project?

Challenges of Urbanization

Overall pressures on **Infrastructure, Sustainability and Livability**

Public safety

Heavy traffic

Pollution

Surplus capacity

Energy shortage

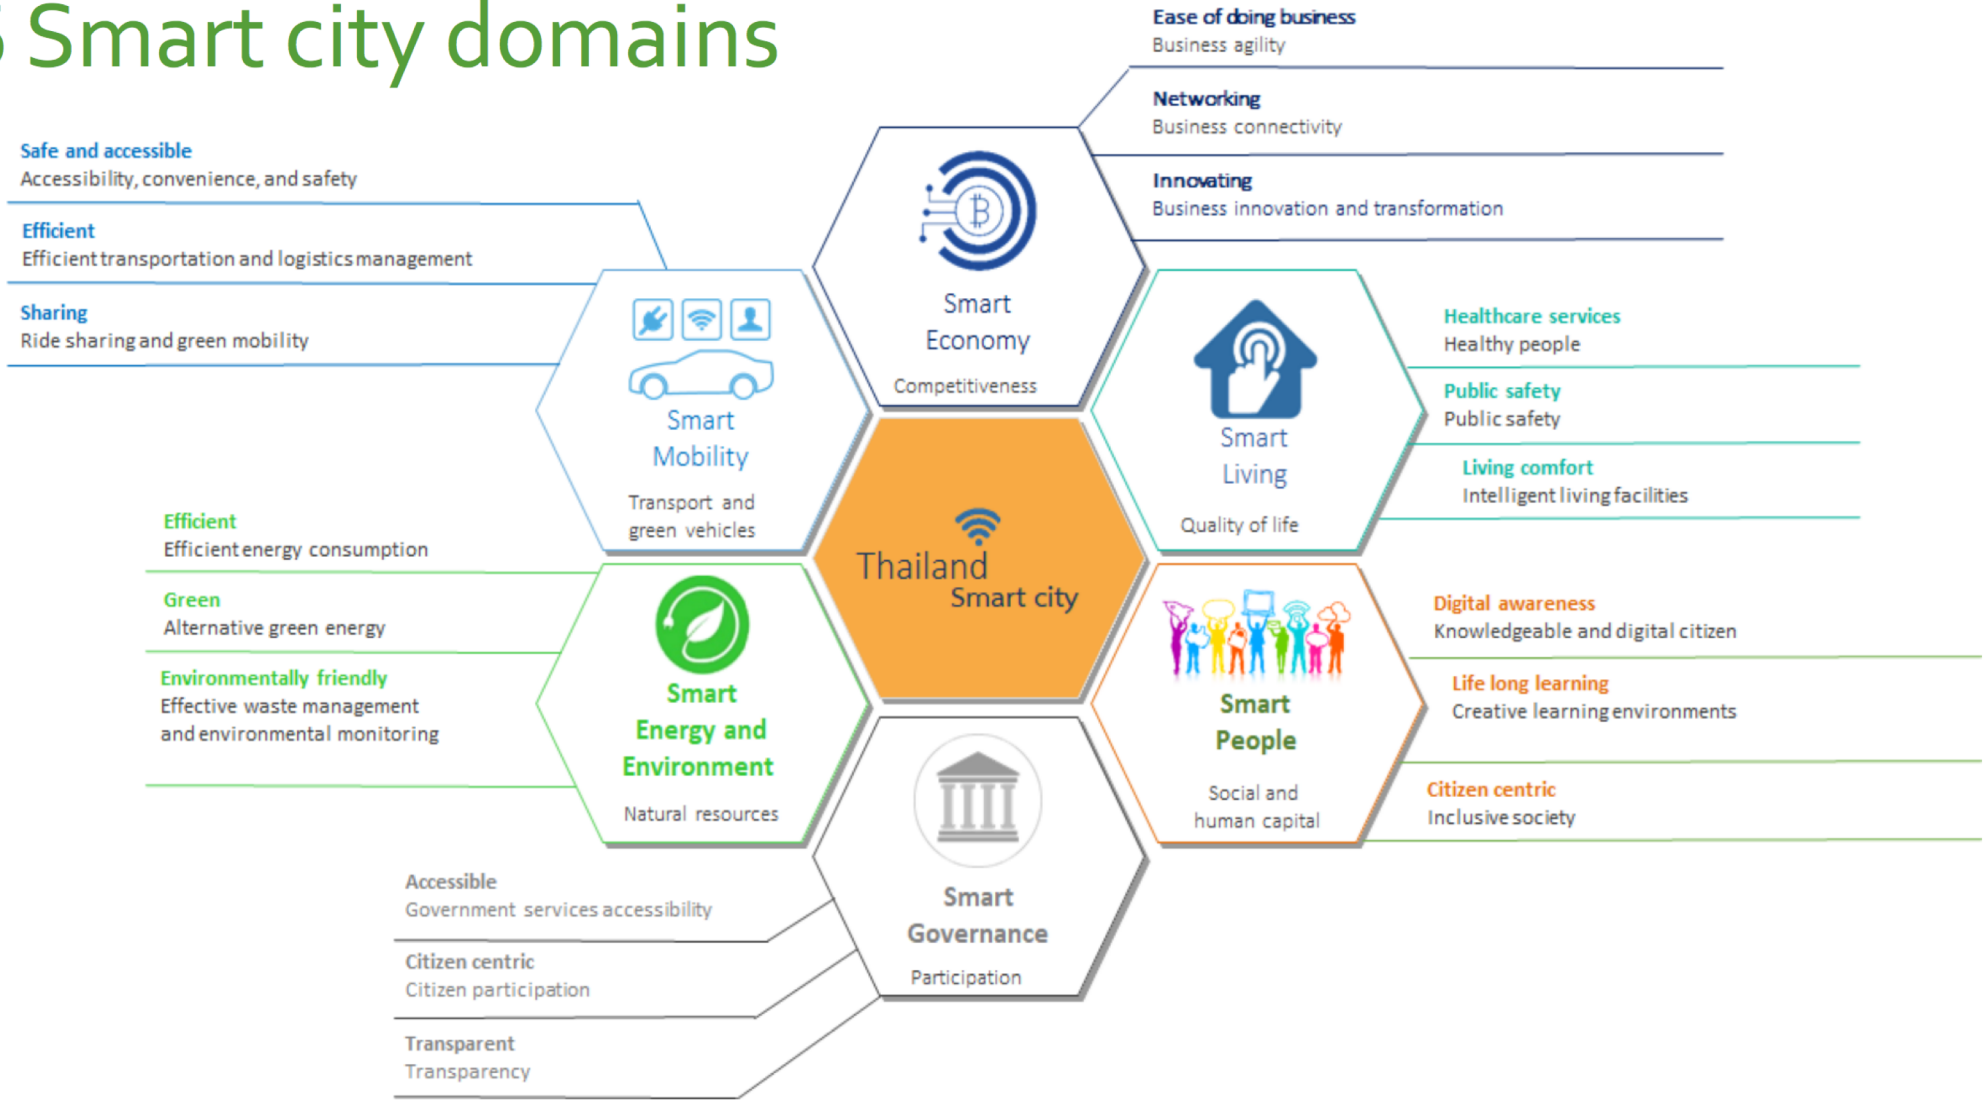

26-27 September 2017

Image Processing & Machine Learning Technology

GNSS Tracking

Web app and Mobile app

Transit Traffic Information

Locate bus stops 01

Predict bus arrival time 02

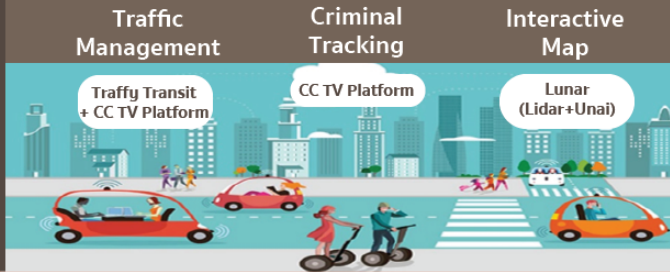

Locate buses in a desired route 03

Analyse bus routes and your trips 04

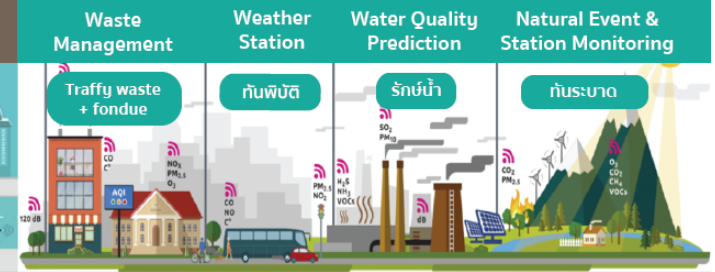

NECTEC Smart City Framework

Application

Smart Mobility

Smart Environment

Technology Integration

AI + Machine Learning

Geo Informatics

Mapping & Location Service

Embedded System

Low Power Wide Area Sensor Network

Data Fusion /Assimilation

Technology

Data Analytics

Image Processing

LiDAR

Localization

Sensors

Data Stream Management

Infrastructure

Cyber Security

Soft Infra

IoT Platform

Cloud Platform

AI Service Platform

City Data Platform

Hard Infra

High Performance Computer

Connected Digital Platform

Data storage

Command Center

Key Results

- KR1: City Data Platform
- KR2.1: Fleet Management
- KR2.2: CCTV Integration and Video Analytics
- KR2.3: LiDAR-based Indoor Localization

- KR3.1: Disaster Monitoring System
- KR3.2: Pandemic Monitoring System
- KR3.3: Waste Collection Management System
- KR3.4: Sea Water Erosion Prediction System

Partnerships

Public and Academic Sector

depa

Private Sector

Issues to Be Considered

- Data Security and Privacy
- Sustainability

Thank You
